

## A.P. Statistics - Homework Rules

Use homework assignment sheet as a cover sheet (include name, date, and period), but put all answers on separate sheet(s) of paper. These answer sheet(s) must be stapled to the cover sheet.

Answers must be given in an easily readable format. If an answer is difficult to read (for any reason), it receives no credit.

Answers must be in context (unless context is not relevant to the problem.)

Answer ALL parts of each question.
